Boost performance, tighten security, and extend the life of your IT assets

Left unmonitored, your network and computers will inevitably fail, leaving employees idle and impacting your ability to do business – costing thousands through the loss of productivity, revenue, or image.

With Managed Services from **IS2 Technologies**, we can take corrective action before the problem occurs, or before you even notice it.

Today's Business Environment

Your business depends on your network's availability, performance, and security - and your software is business-critical.

The five most common frustrations:

- E-mail/Work Order delivery systems down
- Client database unavailable
- Spyware and unauthorized access issues
- Banned software (games and file-sharing) monopolizing resources
- Predictable hardware failures

Managed Services from **IS2 Technologies** provides an affordable solution to these problems.

What are "Managed Services"?

Managed Services means that **IS2 Technologies** is continuously monitoring the health of your infrastructure – and managing growth – by providing:

- ✓ Scheduled site/device reporting – a bird's eye view into the real performance of your IT infrastructure
- ✓ A perspective into what equipment and software has been installed, and where current or new system resources can be best allocated
- ✓ The ability to forecast failures before they occur, such as a critical server running out of hard drive space

Key Benefits

- Significant decrease in downtime
- Improved network and hardware performance
- Fewer 'growing pains' via network capacity management
- Lower costs and increased efficiency via resource reallocation
- Protection against security breaches
- Visits from **IS2 Technologies** are more productive and less intrusive
- Increased employee productivity by automating routine administrative functions

Our proactive approach to managing computer networks will free-up capital that you can spend on GROWING your business, not fixing it.

For a network that will grow with your business, call IS2 Technologies today.
